Rowan College
     of South Jersey

Policy: 4007
Title: **LEARNING MANAGEMENT SYSTEM (LMS)**
Area: Innovation and Technology
Approved: 07/14/20

To ensure the College meets identity verification requirements and creates a seamless learning experience for students, all instructors are required to use the College's Learning Management System ("LMS") as the means to deliver online content for their courses, regardless of course instructional method. If an instructor requires a student to access or complete content online, it must be provided through the LMS.

When a third-party resource is utilized (Pearson, McGraw-Hill, Cengage, etc.), instructors must use the third-party integration within the LMS to connect students with that content.

Administrative procedure will be developed to provide additional information regarding the College's Learning Management System.
